

Exposed Ceiling Joists

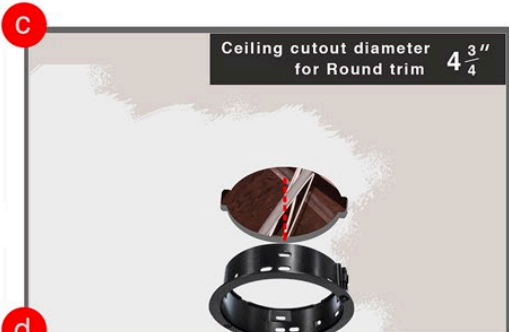

**Step A-** Anchor mounting rails into joists with screws. Slide Bracket Pan with butterfly brackets into mounting rails. Clip mounting rails to secure.

**Step B-** Bottom of bracket pan should either be flush with bottom of ceiling joists or 1/8" higher than bottom of joists

**SLOTTED FLAP** allows for 90° swap of Butterfly bracket & Mounting rails for narrower joist spacing

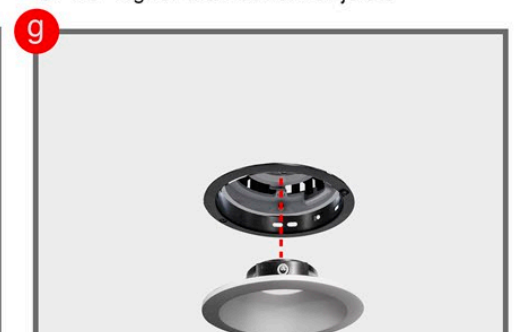

Ceiling cutout diameter for Round trim  $4 \frac{3}{4}$ "

**Step C-** Install ceiling and cut opening. Paint drywall. Slide flange receiver into opening.  
**Step D-** Tighten screws to clamp receiver to ceiling.

**Step E-** Finalize electrical wiring/connections. Then slide light assembly into receiver.  
**Step F-** Ball plungers(4) on light assembly clicks into 4 slots on receiver.

**90° Adjustable Clamp on receiver (retractable)** see 3b for full view  
**CLOSEUP**  
Phillips screwdriver to adjust height of the ceiling clamp to secure a tight fit between GWB ceiling and light fixture.

**Step G-** After light assembly locks into the flanged receiver, slide & lock flanged trim into the receiver.

**How to secure with safety cables?**

**IMPORTANT**  
Ball Plungers on round flanged trim and light assembly needs to click into receiver
