

**Step A-** Remove trim from housing

**Step B-** Remove lamp assembly.  
\*Make sure to shut-off power to fixture. With power off, disconnect lamp assembly.

**Step C-** If possible, lay fixture on a flat surface reflector side up, to prevent pieces from falling out when disassembled.

**Step D-** Unscrew Heat sink in counter-clockwise direction to gain access to the reflector

**Step E-** Remove heat sink from assembly, for easy access to reflector

**Step F-** Remove reflector from lamp assembly.

**Step G-** Center new reflector in assembly.

**Step H-** To re-install, turn heatsink clockwise into lamp assembly. Re-install into ceiling.

### Pan/Tilt Adjustment
