

Step A- Remove trim from housing

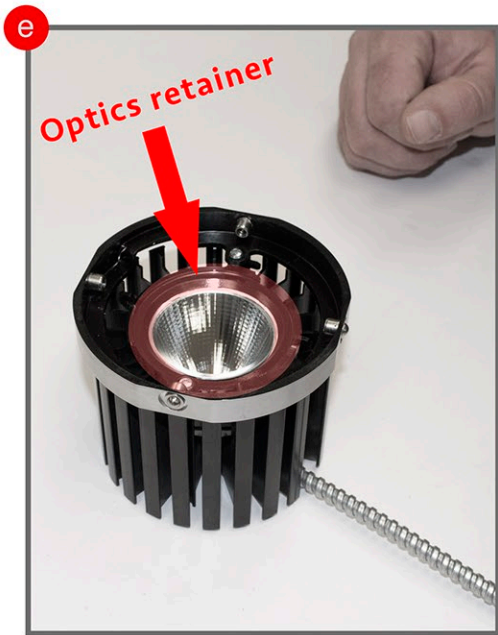

Step B- Remove lamp assembly.
*Make sure to shut-off power to fixture.

Step C- With power off, disconnect lamp assembly.

Step D- If possible, lay fixture on a flat surface reflector side up, to prevent pieces from falling out when disassembled.

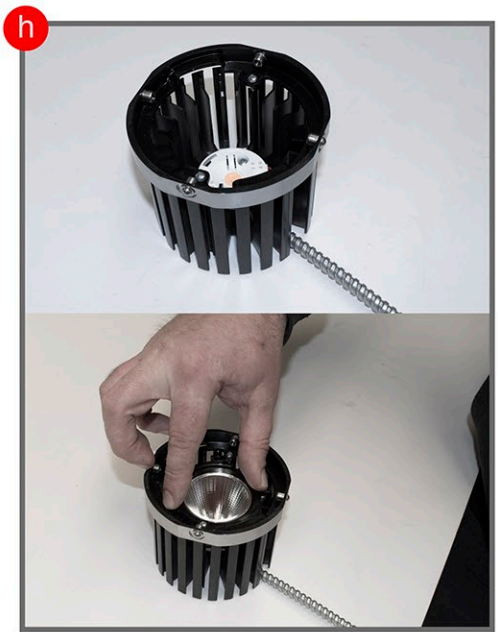

Step E- Locate Optics Retainer (Highlighted in red is the ring that holds the reflector in place).

Step F- Turn Optics Retainer counter-clockwise till piece comes loose.

Step G- Remove Optical Retainer and then remove reflector.

Step H- Install new reflector and optics retainer. Re-install into plaster ceiling.
